**Caring. Teaching.
Pioneering.**

At Abrazo Arizona Heart Hospital, patients are our focus. We put our hearts into caring for theirs. With a pioneering spirit, we dedicate ourselves to patient care, education, and innovation as we carve new paths into the future, helping eliminate cardiovascular disease and saving lives along the way.

Our Six Centers of Excellence

To ensure we provide the most optimized treatment for each patient we see, we created six centers of excellence in one convenient location, each offering truly specialized care.

- Institute for Advanced Aortic Disease
- Institute for Cardiac Arrhythmias
- Institute for Congestive Heart Failure
- Institute for Coronary Artery Disease
- Institute for Peripheral Vascular Disease
- Institute for Valvular Diseases

When physicians partner with us to care for their patients and when patients entrust us with their hearts and lives, we take that responsibility seriously.

CONTINUING A TRADITION OF EXCELLENCE WITH CONCIERGE CARE

Abrazo Arizona Heart Hospital's history of innovation dates back more than four decades. From the founding of Arizona Heart Institute in 1971 through today, we've stayed true to our mission: "To Care. To Teach. To Pioneer."

Early Diagnostics

Our diagnostic programs help calculate each patient's risk factors and screen for the earliest signs of cardiovascular disease.

Comprehensive Testing

Part of our diagnostic services includes comprehensive testing with the latest diagnostic technologies. We provide patients convenient, same-day testing and on-site physician consultations during which we communicate results and talk about treatment options.

Patient-Focused Care

At Abrazo Arizona Heart Hospital, we cater to every patient, providing a concierge experience—from the moment of first contact throughout their time with us. Each patient will have their own Nurse Navigator who will work with them to schedule visits and tests at convenient times and to answer any questions they may have.

At Abrazo Arizona Heart Hospital, we're delivering care that goes beyond—with all our hearts, for every patient, every day.

Caring for patients.

**Teaching our patients.
Sharing our knowledge.**

HARNESSING THE POWER OF KNOWLEDGE

At Abrazo Arizona Heart Hospital, education is an essential part of how we care for patients and our community. Here, we work to advance cardiovascular care and contribute the best possible patient care and a healthier society.

We're Educating the Public

We've been working toward public education about heart disease since the early '80s. For example, we offer a public forum that includes health screenings, education, and coverage of live surgeries. We also take time to answer our patients' questions and to ensure they understand their conditions and their treatment options. We publish many patient education materials that are free to patients, physicians, and the general public.

We're Working with Physicians

We're equally proud of our prominent role in educating physicians about the latest innovations in cardiovascular care. For example, we hosted dozens of physicians from around the country to view a live surgery, and we have more of these teaching opportunities planned. To share our knowledge and expertise, we offer an Endovascular Fellowship Program for one to five physicians from all over the world, giving them the chance to shadow our physicians and learn about new treatments.

We also offer specialized continuing education to referring physicians that is tailored to the needs of their patients.

“Share your knowledge. It is a way to achieve immortality.”

—DALAI LAMA XIV

**Focusing on innovation.
Advancing cardiovascular care.**

IMPROVING THE FUTURE OF CARDIOVASCULAR CARE

As a result of our innovations, conditions like coronary artery disease, aortic aneurysms, and peripheral vascular disease can often be treated with minimally invasive techniques. We continue to embrace new technology and participate in clinical trials to offer our patients optimal treatment in a patient-centered environment—where their health is a matter of the heart.

We're Making Medical History

We've been on the forefront of innovation since the '70s, playing a role in improving cardiovascular care and treatment. Our patients have been among the first to benefit from medical advancements developed by physicians at our hospital—advancements that were later adopted by physicians and surgeons worldwide. Through clinical trials and research, we are discovering life-saving treatments that give our patients hope. By partnering with physicians like you, we're cultivating collaborative relationships that can improve patient care and save lives.

We're Focused on the Future

At Abrazo Arizona Heart Hospital, we've made research a priority. While patient care always comes first, we also believe it's vital to the future of medicine to continually learn and grow. We are directly involved in developing exciting diagnostic technologies, non-invasive medical devices, revolutionary drug therapies, and groundbreaking surgical and interventional techniques. Our research programs have produced results that continue to have a significant positive impact on the lives of patients suffering from heart disease. At Abrazo Arizona Heart Hospital, the future of cardiovascular medicine is here and now.

“Do not go where the path may lead, go instead where there is no path and leave a trail.”

—RALPH WALDO EMERSON

Partnering with You in Patient Care

We are honored that you're considering referring your patients to us. We will work closely with you to ensure you and your patients receive the best service and care we can offer.

When you partner with us, you can expect:

- **Benefits for your patients**

To ensure every patient and physician receives excellent service, we:

- Schedule patient visits the same week they are referred whenever possible
- Accommodate same-day appointments by request
- Schedule diagnostic testing and outpatient visits for a single visit
- Provide test results the same day

- **Benefits for your practice**

To make the referral process smooth and efficient, we will assign you your own Nurse Navigator who can:

- Answer your referral questions
- Provide updated information about our physicians and services
- Listen to your ideas about how we might improve your referral experience

- **Complimentary patient brochures and materials**

We offer free educational material about a variety of cardiovascular topics to help your patients understand their conditions and treatment options.

- **A personal tour of our facilities**

If you're interested in learning more about our physicians, staff, and facilities, we'll give you a tour so you can meet the people and see the technologies that we believe make us a destination cardiovascular hospital.

On behalf of our physicians and staff, we look forward to meeting you and partnering in the care of your patients. Call our Nurse Navigator today at 602-240-6152 to get started.
